### Is it possible to remove DRM and convert iTunes movies with subtitles preserved?

"I have stored a large number of M4V movies and TV shows in iTunes library. Currently I want to remove the DRM protection from those movies and convert the M4Vs to my newly bought Android tablet for watching. I tried different iTunes video converter but none of them could keep the original subtitles in the output videos. Any suggestion?"

"I'm a German user of iTunes. My problem is that most of the movies I bought from iTunes Store come with multiple subtitles in which English is set to be the default language when watching those movies. I'm wondering if there is any iTunes DRM removal tool that can remove DRM from iTunes videos while keeping the Deutsch as the only subtitle there?"
